PARCOURS PROFESSIONNEL

Principaux éléments de votre parcours à mettre en évidence par le président de session lors de son introduction

Rajendra Akerkar is a professor of Big Data Technologies at Western Norway Research Institute, Norway. He leads Big Data and Emerging Technologies research at the institute. His research focuses on application of big data science to real-world challenges in mobility, transport, emergency management and resilience, and data analytics in a wide set of semantic dimensions. Dr. Akerkar has made contributions to semantic technologies and intelligent information management fields. His research and teaching experience includes over 29 years in academia spanning different universities and institutes in Asia, Europe and North America. He has led several large collaborative research and innovation projects funded by both industry and government funding agencies, including the European Union Framework Programmes and UNESCO. He is currently leading a major transnational research initiative on disruptive technologies for critical infrastructure resilience.
