- BWV staat voor kennisdeling binnen België over de gewestgrenzen en organisatiegrenzen (publiek en privé) heen
- AWV nam 4 dec'23 voorzitterschap BWV over van SPW
- Voorzitter is "first delegate" van België voor **PIARC**

What is PIARC?

- **PIARC = World Road Association**
- We were **founded in 1909** as a non-profit, non-political association
- **First global forum for the exchange of knowledge, policy and practice on roads and road transport**
- Recognised for the quality and neutrality of our work
- Work with HICs as well as with LMICs

- We have **127 member governments**, as well as regions, groups/companies and individuals.

- The Association mobilizes the experience and knowledge of **1,200 experts** from more than 80 countries in **20+ Technical Committees and Task Forces**.

> Hoe werkt PIARC?

- Op basis van **vrijwilligers**, experts uit publieke en private sector.
- Sinds 1909 organiseert PIARC **elke vier jaar** een World Road Congress.
- Het doel van het congres is om een forum te bieden voor professionals van over de hele wereld, in elk facet van de **ontwikkeling, het beheer en de exploitatie van wegen** en wegvervoer, om hen inzicht te geven in de vooruitgang die in verschillende landen wordt geboekt. om **actuele kwesties** en de **toekomstige uitdagingen** van de wegsector te bespreken, en om **kennis te delen.**

XXVIIth World Road Congress Prague, 2-6 October 2023

“Together on the road again”

“Together on the road again”

> 27ste Wereld Wegen Congres

- Samenbrengen van meer dan **6.000 deelnemers** uit 120 landen samen (waaronder 1.700 Tsjechische en Slowaakse studenten, 4.000 afgevaardigden en 40 ministers en vice-ministers van over de hele wereld)
 - Kennis, diverse standpunten, het beste beleid en de beste **praktijken deelden**.
 - Het congres organiseerde **65 sessies**, 16 workshops en 15 technische bezoeken in 5 dagen.
 - Presentatie van resultaten van rapporten van de cyclus 2020-2023

PIARC publications from 2020 - 2023 work cycle

This page presents the technical reports of the 2020-2023 work cycle of PIARC (World Road Association). They are available in one or more of the three working languages of the Association which are French, English and Spanish and have been published after a meticulous validation and quality control exercise.

These reports will be published as they are drafted by our [Technical Committees](#), which work according to the objectives set out in the [Strategic Plan 2020 - 2023](#). Reports from the previous work cycle are already available on [this page](#).

They are accessible directly by clicking on the reference in the right column of the table below. This follows the structure of the 2020 - 2023 Strategic Plan.

» [Strategic Theme 1 - Road Administration](#)

» [Strategic Theme 2 - Mobility](#)

» [Strategic Theme 3 - Safety and Sustainability](#)

» [Strategic Theme 4 - Resilient Infrastructure](#)

» [Special Projects](#)

» [PIARC Technical Reports on the COVID-19 crisis](#)

» [Cross-Cutting Committees](#)

Technical Committee 1.1 "Performance of Transport Administrations" focuses on identifying best practices for establishing a framework for measuring the efficiency and effectiveness of Transport Administrations, including the establishment of assessment indicators/evaluation indexes (benchmarking) that can be used to recognize opportunities for improving the overall performance of transport administrations, with a particular focus on overall customer experience and communication of performance information. All this, taking into account the impact of the sharing economy and other disruptive technologies on the performance of Transport Administrations.

In addition, Technical Committee analyzes effective approaches for defining and promoting diversity in opportunity across the roads and transportation sectors, as well as how to attract new employees into the transport industry/profession, specially, young professionals. ([extract from the Strategic Plan](#))

DISCOVERING PIARC WORK TOPICS OUR ACTIVITIES NEWS & AGENDA

» The Role of Transport Agencies in Shaping Disruptive Technologies and Service Models - Case Study Summary Report

Through its Technical Committee 1.1 Performance of Transport Administrations , PIARC is undertaking an extended investigation of disruptive technologies & service models impacting the roads and transport sector, and how transport agencies are responding to the related challenges and opportunities in policy, regulatory and organisational terms. Key questions being examined by TC 1.1, via its Working Group 2, include: · What are the technologies and service models having the greatest potential [...]

» Customer Experience -Case Study Analysis

Research continues to show that when public agencies offer a better customer experience, they deliver measurable impacts across multiple priorities. To that end this report focusses its research on what approaches are currently happening across the world in respect of delivering an improved experience for all our customers and stakeholders. It is acknowledged that in many industries, the term “user” designates a person who uses a product or service and the term “customer” refers to a person [...]

» The Role of Transport Agencies in Shaping Disruptive Technologies and Service Models - A Private Sector Roundtable

Through its Technical Committee 1.1 Performance of Transport Administrations, PIARC is undertaking an extended investigation of disruptive technologies & service models impacting the roads and transport sector and how transport agencies are responding to the related challenges and opportunities in policy, regulatory, and organisational terms. Key questions being examined by TC 1.1 include: • Which technologies and service models are having the greatest potential impact, in which ways, and [...]

Strategic Theme 4 - Resilient Infrastructure

Resilient road infrastructure is essential for ensuring the safety and reliability of our transportation systems. Building and maintaining roads that are able to withstand natural hazards and other challenges, we can help ensure that people are able to travel safely and efficiently.

Strategic Theme 4 "Resilient Infrastructure" responds to the key infrastructure issues aims to provide information on how to address them.

NEWS & AGENDA

4.1 Pavements

During the 2024-2027 cycle **Technical Committee 4.1 "Pavements"** focuses on pavements and road surface characteristics. A cross-cutting theme for ST4 is the reduction of carbon footprint. TC 4.1 contributes to this task with a report on carbon calculators for pavements and case studies on how to reduce the carbon footprint during the construction of the pavement and/or its use. Pavements in urban areas get more and more attention, albeit for fighting heat island effects or for providing a surface for "new" types of vehicles and other road users. (*[extract from the Strategic Plan](#)*)

An extensive and diverse global membership base

Association members share the common goal of an integrated, sustainable and safe transport system. From national and regional authorities to collective members and individuals - all are concerned with the spectrum of issues relating to roads and road transport.

Apart from the benefit of participating in the international road community, all members receive

- the quarterly magazine *Routes/Roads*,
- Congress proceedings,

and get a reduced registration fee for our Congresses (World Road Congresses and International Winter Road Congresses).

- To become member of the Association, [Click here!](#)
- To subscribe only to the *Routes/Roads* magazine, [click here](#) or [contact us](#).
- To view or to download some documents, you need to have a [visitor account](#) or to [log-in](#).
